

FPI: Continuous monitoring of 3D e & i VDFs through the shock layer

A quasi-perpendicular supercritical shock

$$M_A \sim 7.8$$

$$\beta_i \sim 1.1$$

$$\beta_e \sim 0.3$$

$$\theta_{Bn} \sim 115 \text{ (65)}$$

3D eDFs from the main Te ramp confirming the earlier ISEE2 picture

& show the heating process!
