The SORCE Science News is the official newsletter of the SORCE Science Team. It is distributed monthly to all SORCE team members and is also available on the SORCE web site. The SORCE Science News represents the work of the SORCE Science Team and is intended to inform the scientific community about the latest developments in solar physics research.

The SORCE Science Team is an international group of scientists who are studying the Sun and its effects on the Earth. The team is composed of over 50 researchers from around the world, and they are working on a variety of projects related to solar physics. The SORCE Science News provides updates on the latest research, as well as information about upcoming events and opportunities for collaboration.

The SORCE Science News is published monthly and is available online at the SORCE web site. It is also available in print form upon request. If you would like to receive the SORCE Science News by email, please contact the SORCE Science Team at sorce@larc.nasa.gov.
