

Public vs Non-Public Data

GOAL: Put all data appearing in publications on the public side – goal is to finish by submission of the 2022 Senior Review (Nov 2022)

- ☒ Start bi-weekly meetings of the DSWG
 - ☒ add this topic to agenda, to address questions and clarify/adjudicate special cases

- ☒ Commissioning data that are L2 and/or have appeared in publications made public
 - ☒ data directory structure to follow the current SDC scheme to place the commissioning data under its appropriate directories in 2015, so spedas/SPDF data load software can find them without extra effort
 - ☒ mms*/edp/comm/l2
 - ☒ mms*/scm/comm/l2
 - ☒ additional commissioning datasets used in publications (instrument teams to identify these data products and provide them to Kris; an example publication used commissioning datasets here)

- ☒ All L2 data products made public
 - ☒ mms*/feeps/raw/l2
 - ☒ mms*/fpi/slow (there is no slow L2 data at the SDC)
 - ☒ mms*/fpi/fast/trig
 - ☐ any others?

- ☒ All L3 data products made public
 - ☒ mms*/fpi/brst/l3
 - ☒ mms*/fsm/brst/l3
 - ☒ any others?
 - ☒ mms*/feeps/srvy/l3

- ☒ AFG and DFG L2 pre-FGM data made public (no L2 AFG/DFG data as confirmed by the MAG team)
