

What would you like the BESSIG to be?

The Boulder Earth and Space Science Informatics Group is intended to benefit and be sustained by its members.

What would you like to get from the BESSIG? How would you like to participate? What are you able to contribute? What do you see as the goals of the group? Towards those ends, how would you like to see it organized?

This group could be informal gatherings of people that go out to lunch on occasion or meet for an FAC. Or we could hold scheduled meetings with speakers. Or we could just meet once, eat dinner, and call it good.

At our launch meeting we'll gauge interest and discuss possibilities. Please feel free to add your thoughts here about this topic.
