#### **NOTE for those that visit NASA**

**Goddard** – A new Main Gate entrance and badging office on ICESat Road is operational (see [map](#)). The new badging office in Building 17 is intended to provide an improved experience for visitors and employees.

When hosting, please feel free to think broadly about your approach. For example,

- It is perfectly fine to have fewer, longer presentations rather than the standard three short presentations.
- Consider simply leading a discussion of an open question, a new event, or an analysis /simulation tutorial.
- Invite people to present that are "further afield" than your own team. (e.g., a newly published paper of interest.)
- If your week overlaps with a major conference or MMS SWT meeting, please anticipate that telecon will be cancelled.

As always, every host prioritizes anyone from across our community that wishes to present their new material for feedback from the team, especially to check the use or interpretations of the datasets.

If you are a "late breaking" co-author addition to an about-to-be submitted paper, it is a good practice to ask the author of that paper to present at this forum.
