

Juno Attitude and Orbit Geometry

May 31, 2017

Marty Brennan & Stuart Stephens

This document was reviewed and approved for export, see Juno-Generic-15-001

This document has been reviewed and determined not to contain export-controlled technical data

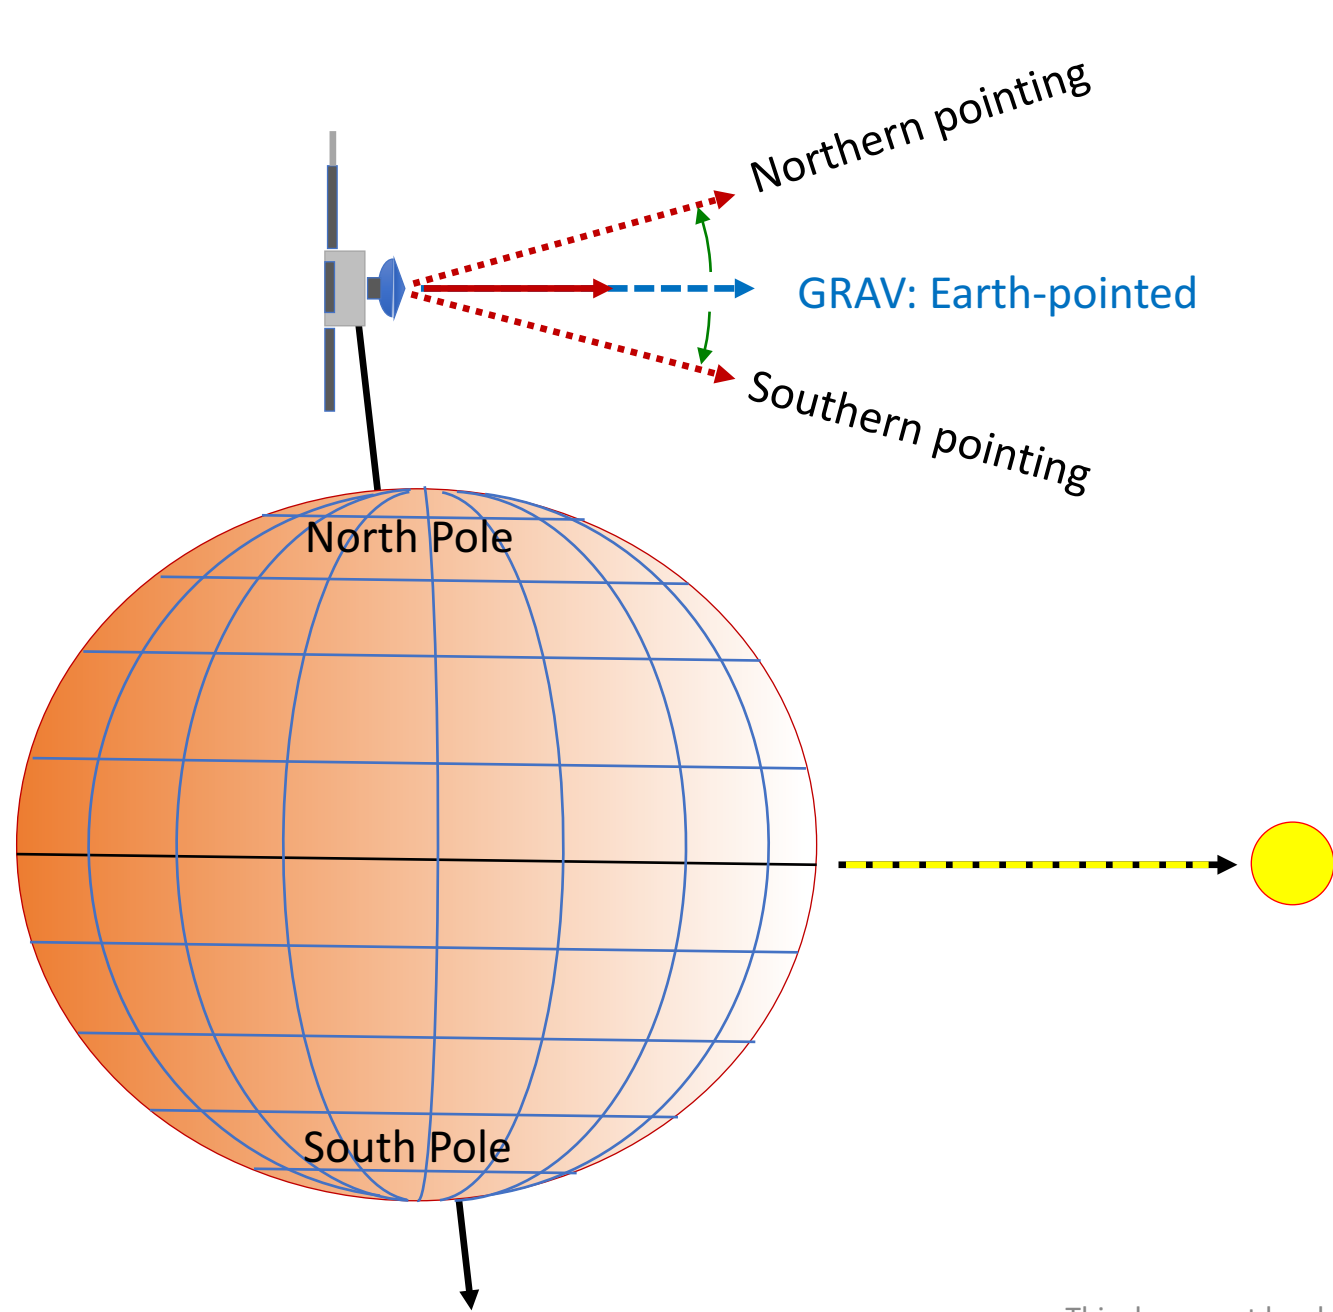

View from above Jupiter North Pole

- Sun Direction 
- Earth Direction 
- Juno Spin Axis 

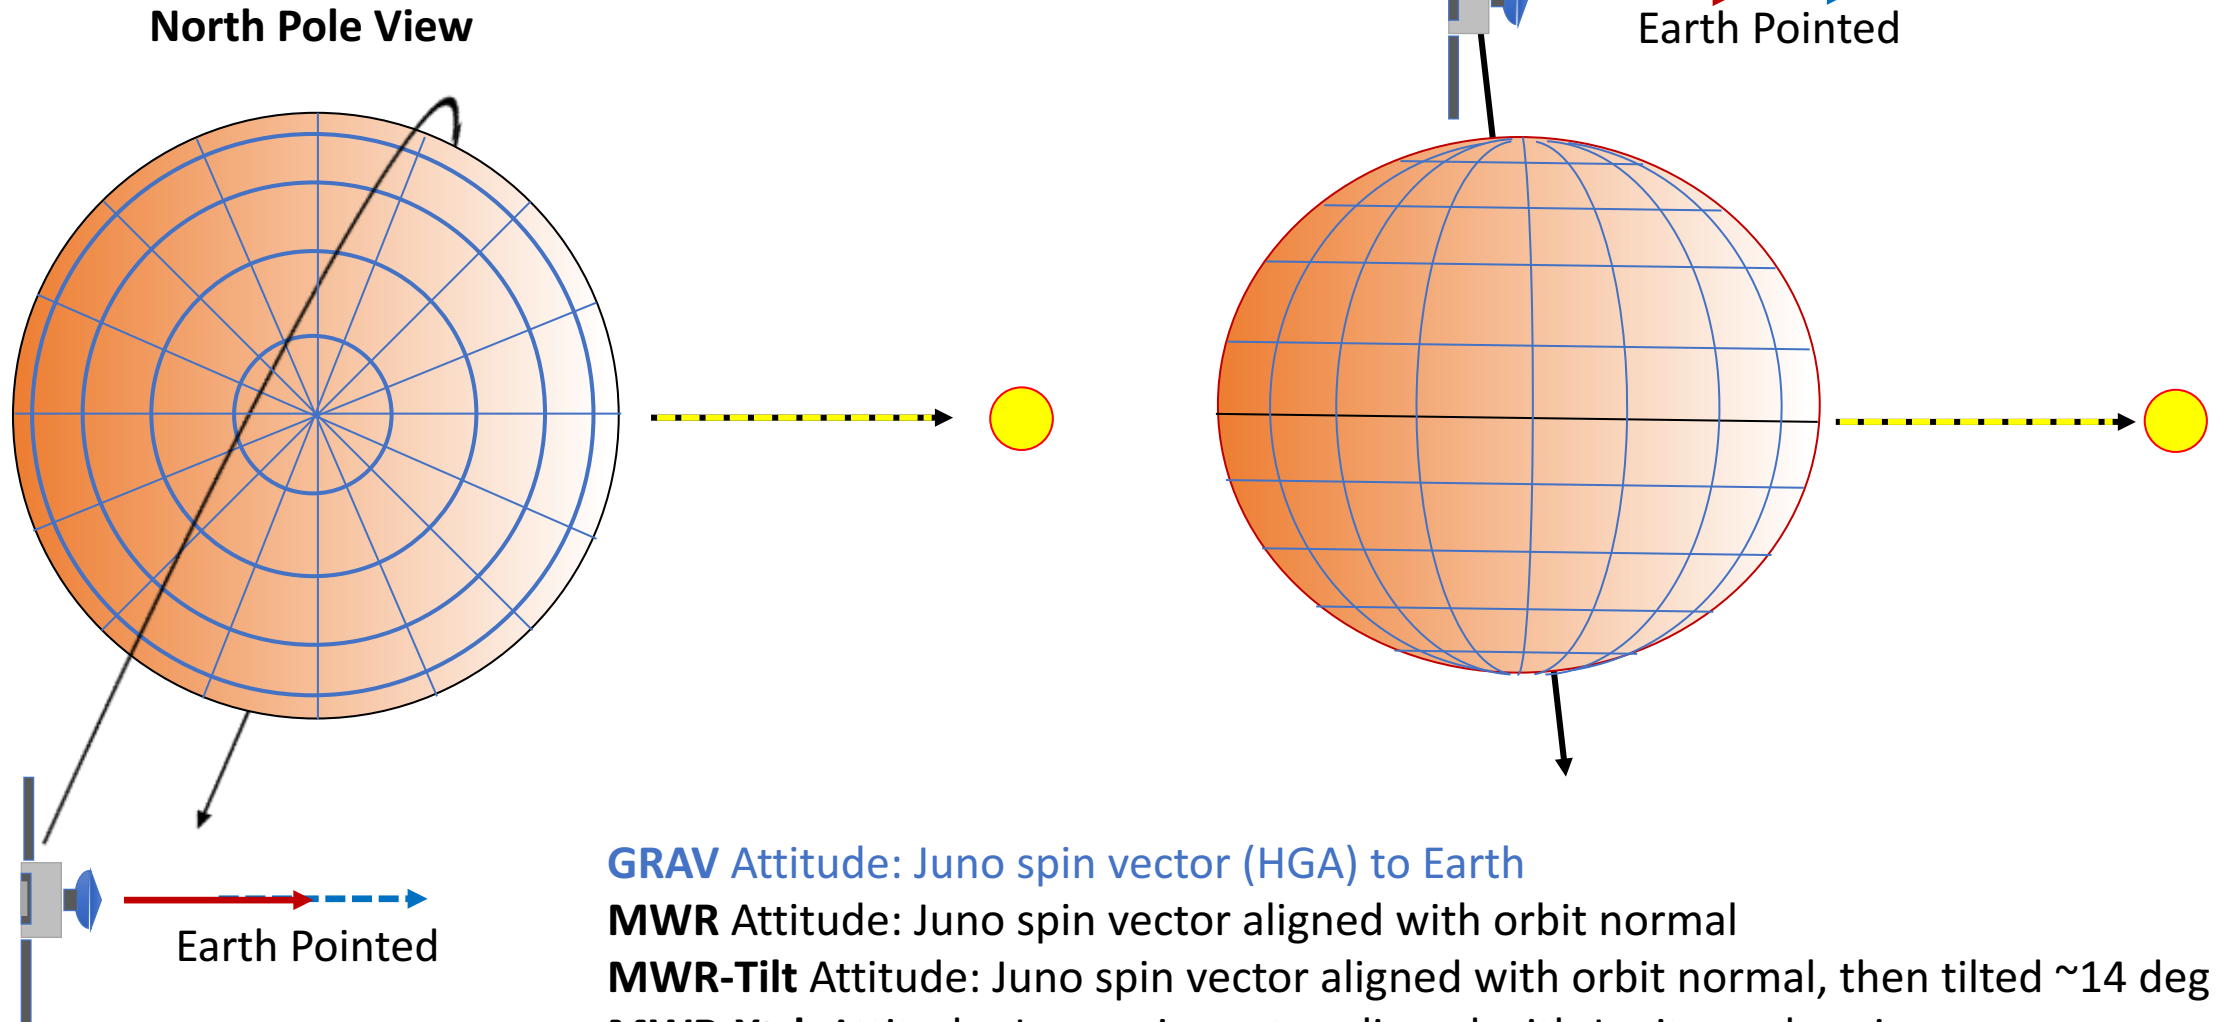

View from Jupiter Equator, Edge-on to Juno Orbit Plane

This document was reviewed and approved for export, see Juno-Generic-15-001

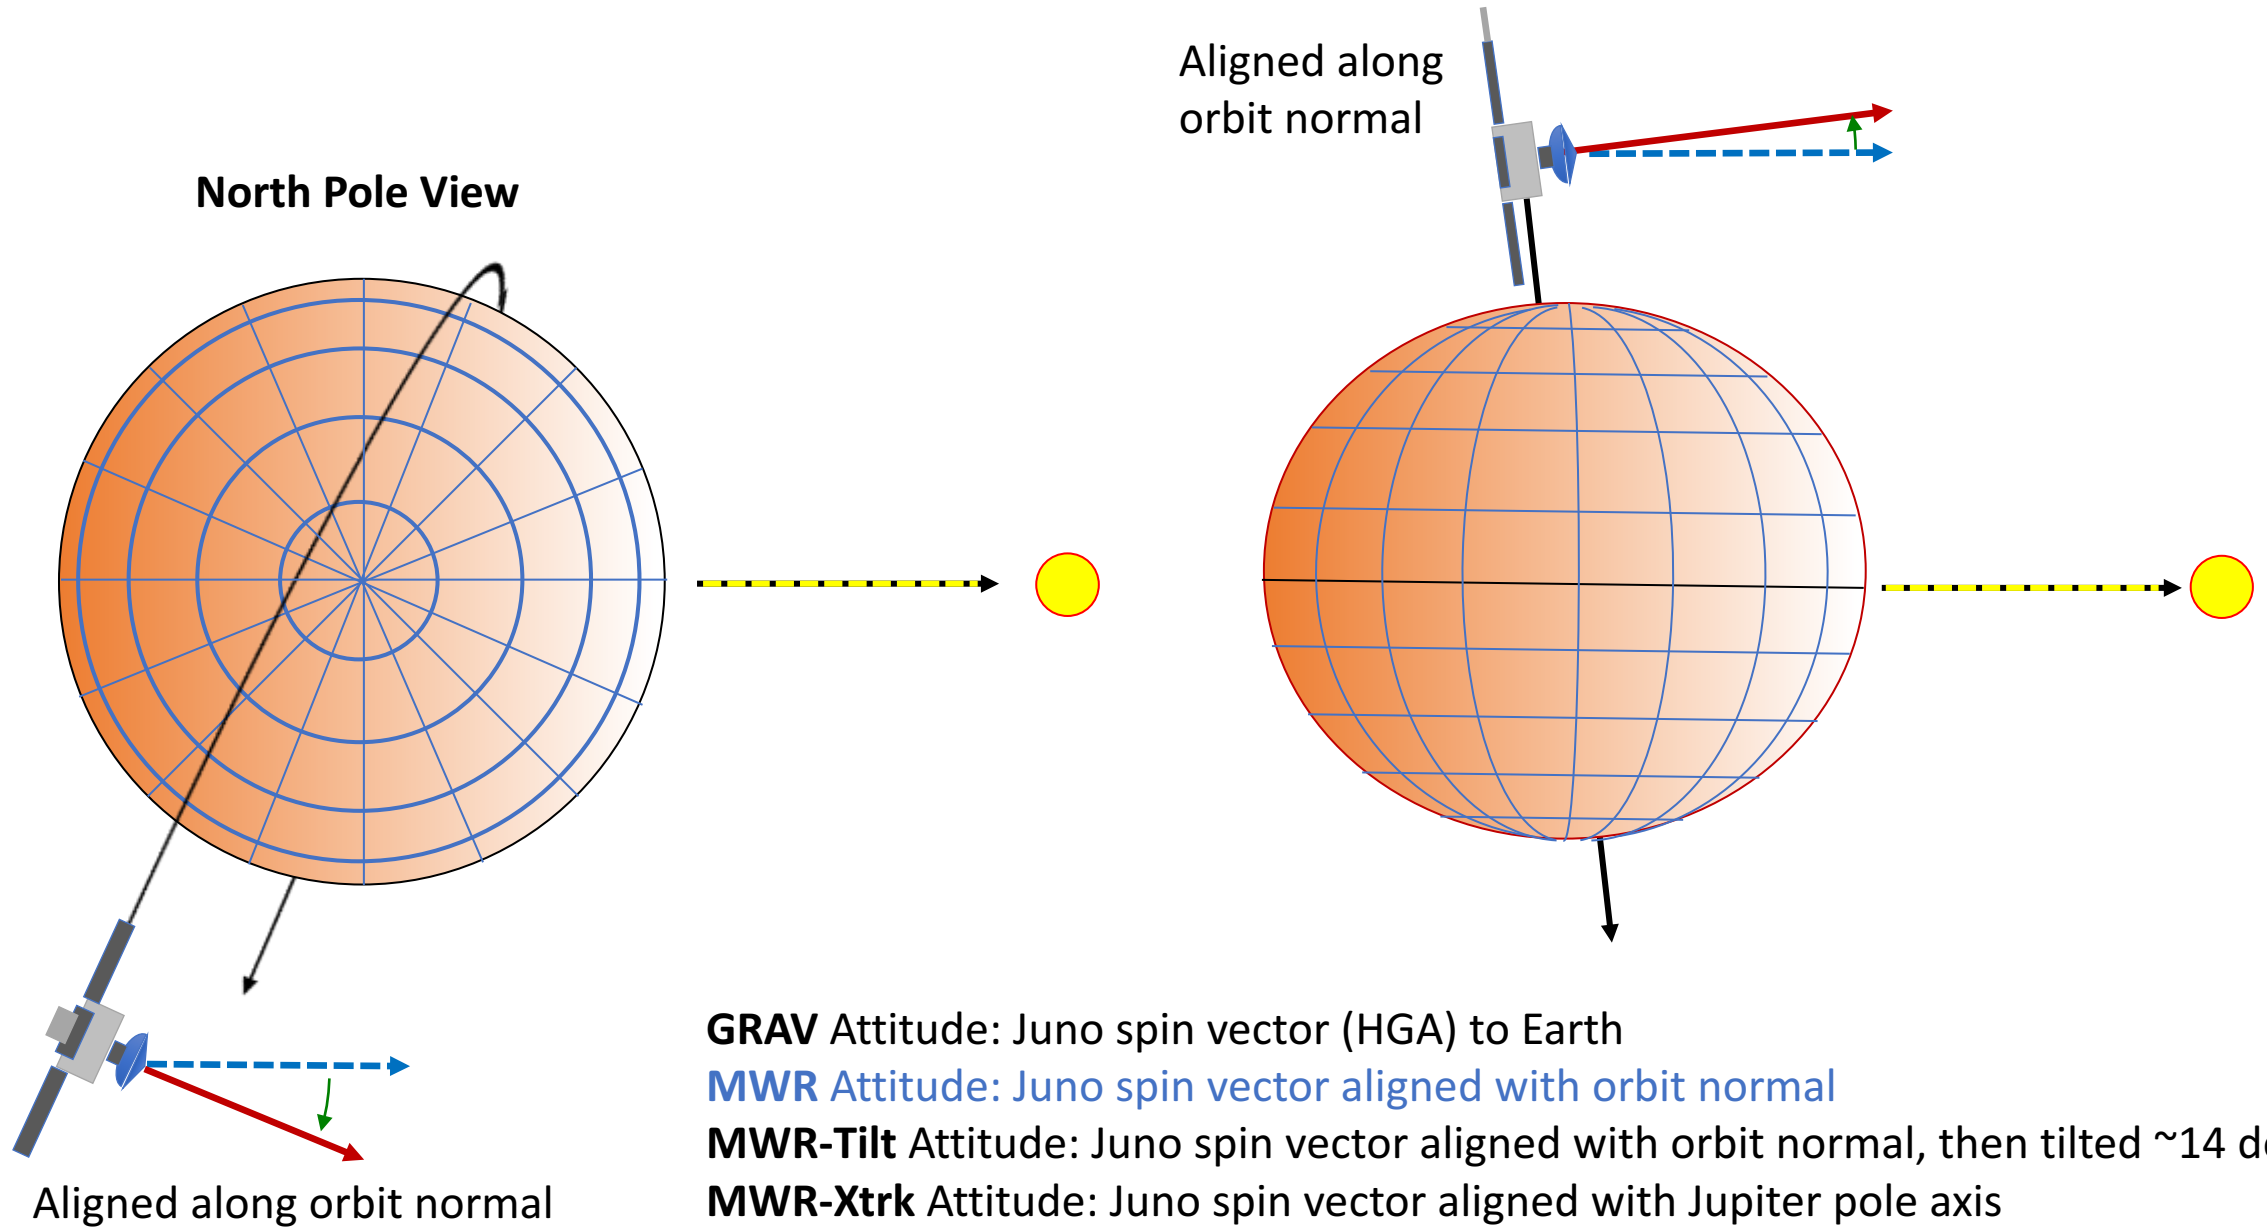

- Sun Direction 
- Earth Direction 
- Juno Spin Axis 

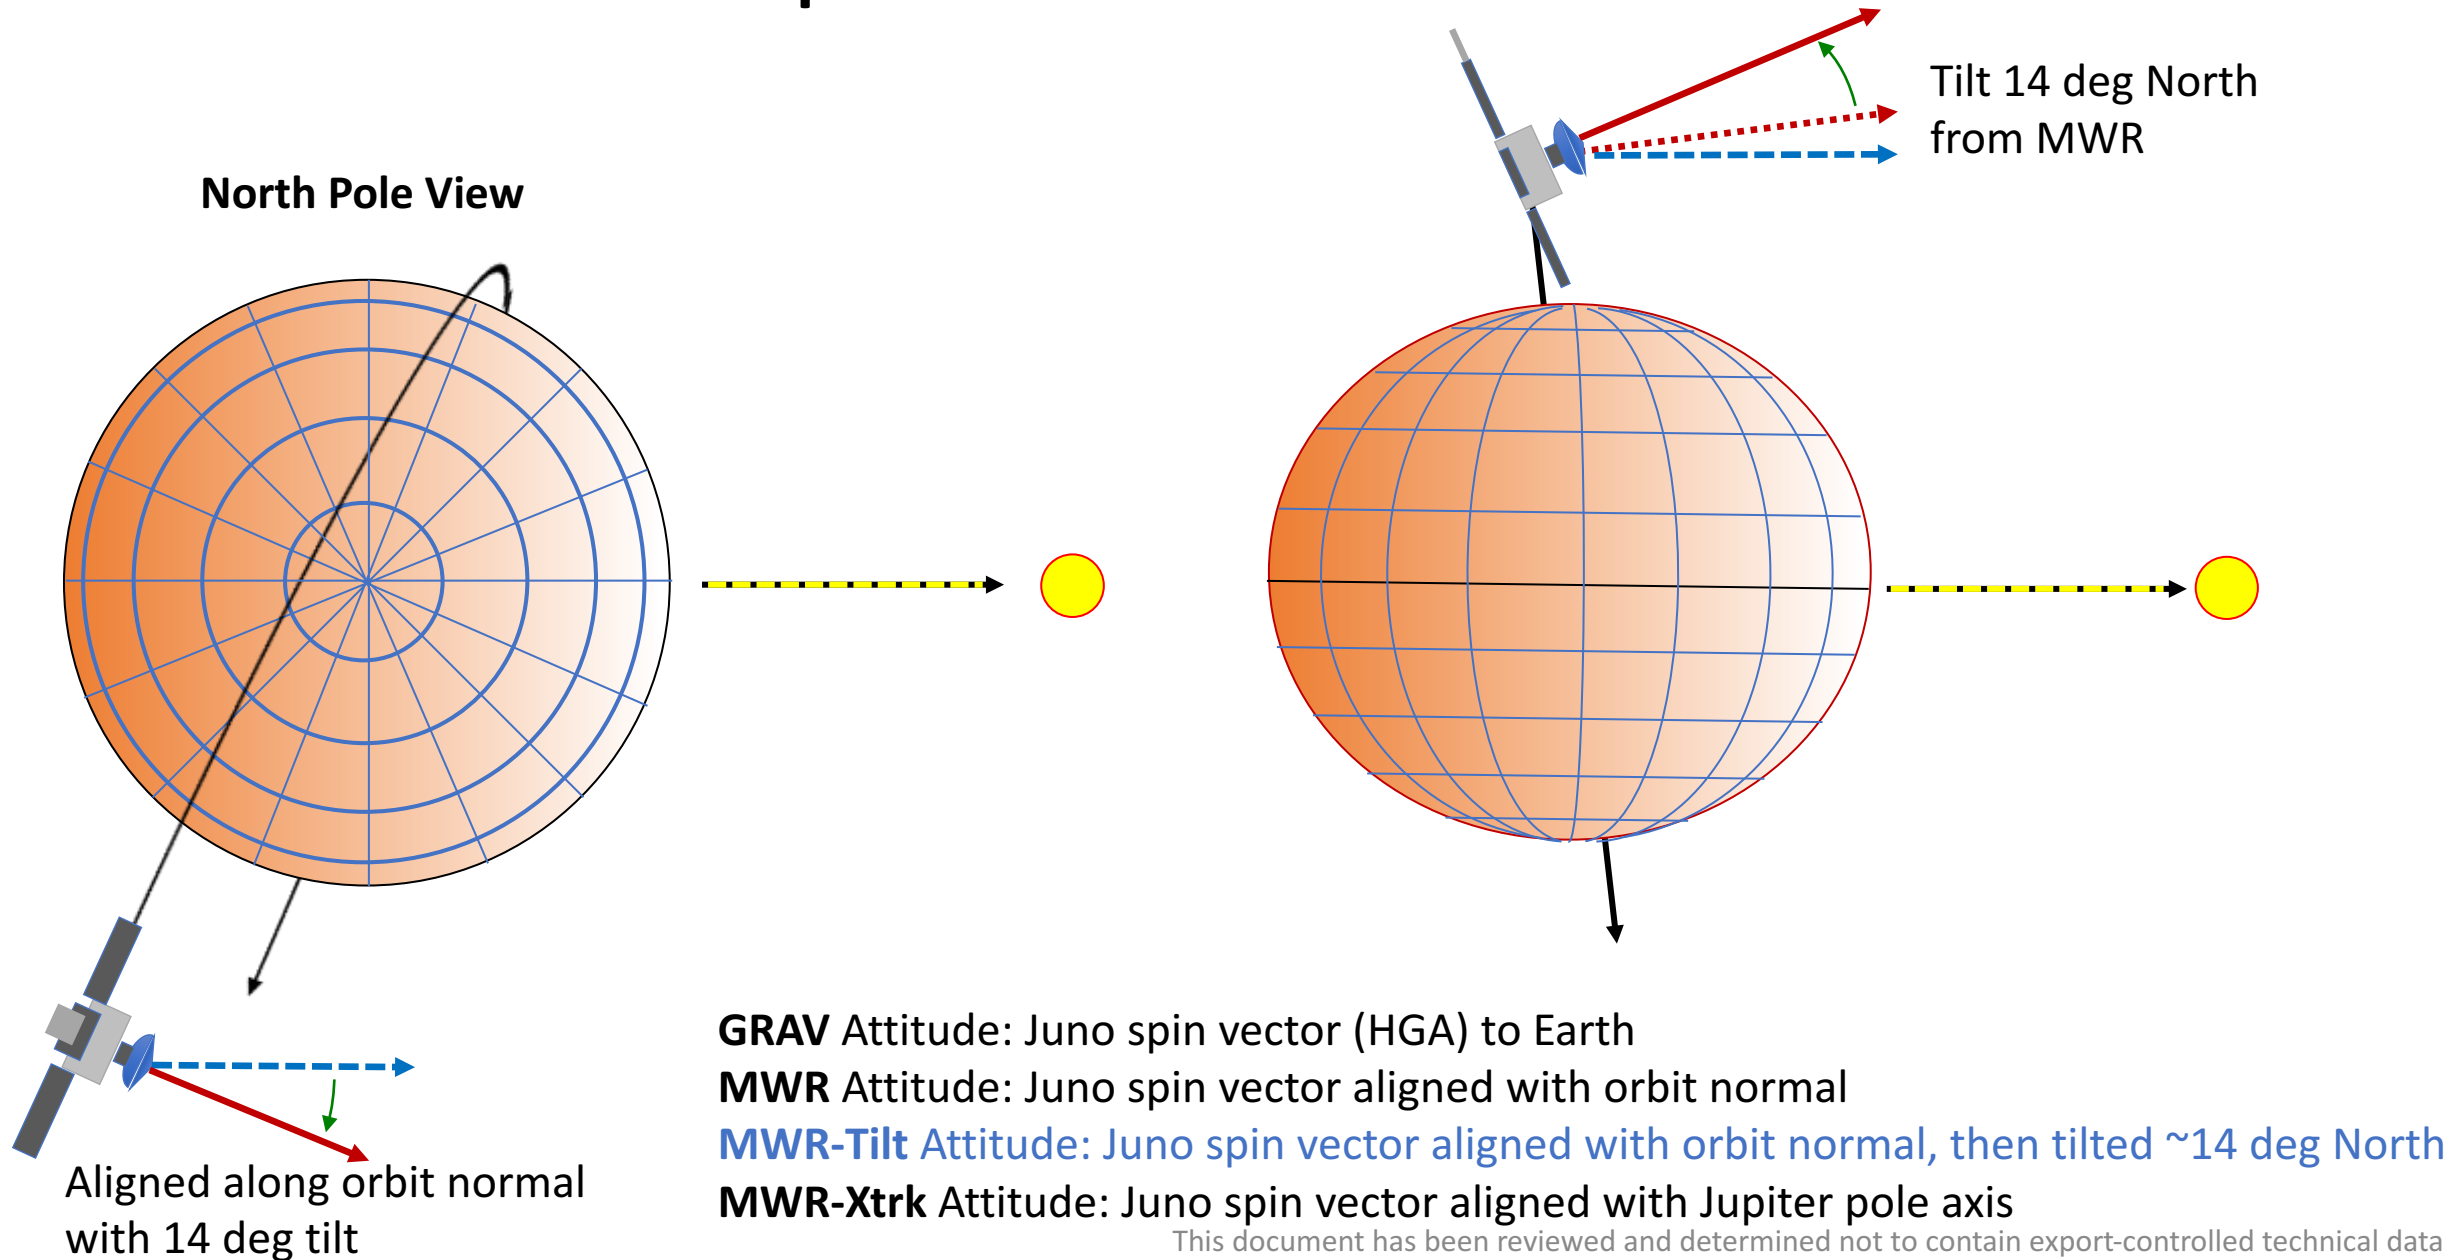

GRAV Attitude Example

MWR Attitude Example

MWR-Tilt Attitude Example

MWR-Crosstrack Attitude Example

Proposed Attitude: 30° Offset from Sun towards MWR

North Pole View

30° offset from Sun

Equatorial View
Edge-on to Orbit Plane

30° offset from Sun

GRAV Attitude: Juno spin vector (HGA) to Earth

MWR Attitude: Juno spin vector aligned with to orbit normal

MWR-Tilt Attitude: Juno spin vector aligned with orbit normal, then tilted ~14 deg North

MWR-Xtrk Attitude: Juno spin vector aligned with Jupiter pole axis

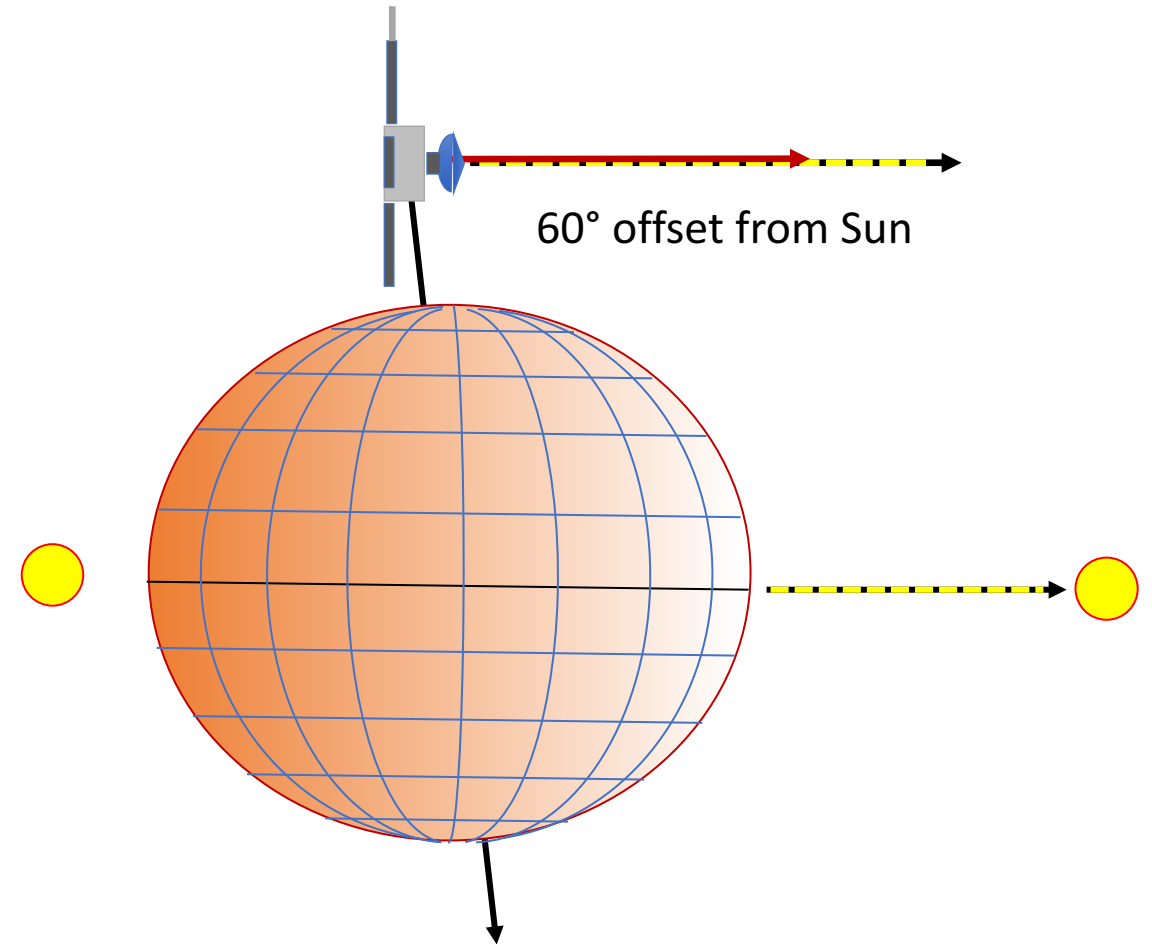

Proposed Attitude: 60° Offset from Sun towards MWR

North Pole View

60° offset from Sun

Equatorial View
Edge-on to Orbit Plane

- GRAV** Attitude: Juno spin vector (HGA) to Earth
- MWR** Attitude: Juno spin vector aligned with to orbit normal
- MWR-Tilt** Attitude: Juno spin vector aligned with orbit normal, then tilted ~14 deg North
- MWR-Xtrk** Attitude: Juno spin vector aligned with Jupiter pole axis

Diagram of Jupiter location around Sun and Juno orbit plane geometry at each Perijove (PJ)

PJ #	Type	Time (UTC/SCET)	NON to Sun (°)	NON to Earth (°)	+/- SPE (°)	SEP (°)
0	JOI	07/05/2016 02:47:32	2.9	12.0	9.7	64.1

For spk_ref_161212_210731_170320.bsp (reference trajectory for 53-day orbits). Data are according to each PJ.
 XTk = crosstrack. NON = negative orbit normal.
 S, P, E, J = Sun, Probe, Earth, Jupiter in SPE, SEP, JPE, SJP.
