

SORCE Undergraduate Researchers

Marty Snow [marty.snow@lasp.colorado.edu] and Erin Wood, Laboratory for Atmospheric and Space Physics (LASP), University of Colorado, Boulder, CO, USA

The SOLar Radiation and Climate Experiment (SORCE) supports undergraduate researchers from around the country at the University of Colorado. These students participate in a Research Experience for Undergraduates (REU) program focused on Solar and Space Physics. This poster will showcase some of their work with mentors from the SORCE science team.
